

SAVE THE DATE

11th SWISS NORD

Novartis Oncology Research Day

MEETING

Thursday, 28th of October 2021

12:00 to 18:00 hrs

Novartis Campus Basel

Dear Doctor

We are pleased to invite you to the 11th swiss **Novartis Oncology Research Day (NORD)**.

We are delighted to have again the **Swiss Group for Clinical Cancer Research (SAKK)** as our scientific partner in 2021.

The main objective of the Swiss NORD meeting is to provide a forum for Swiss investigators to interact with Novartis research and development colleagues as well as the local medical department in order to discuss current and future treatment approaches and potential projects in cancer therapy and facilitate collaborations between different stakeholders.

We will start with a plenary session, where an overview on recent and future directions in cancer research will be given by representatives from Novartis and SAKK.

Afterwards important questions around preclinical, translational, as well as clinical research and diagnostics within various disease areas will be addressed in four different workshops. These interactive discussions will hopefully pave the way for new and deeper collaborations that lead to advances in cancer treatment.

Workshop 1	Workshop 2	Workshop 3	Workshop 4
PI3K inhibition in solid tumors	Gastrointestinal tumors and early compounds	Hematology	Cell & Gene

The official agenda and invitation will follow soon together with more specific information about the workshops.

You can already register now! Please send your name and institution to swissonco.medical@novartis.com, highlighting your 1st and 2nd priority for the workshops. Do not hesitate to contact us for further information.

We are looking forward to hopefully welcoming you at the Basel Campus in person soon.

Best regards,

Stefan Albrecht, PhD
Medical Director Novartis Oncology

Prof. Dr. med. Roger von Moos
President SAKK
