## DETAILS

**September 22 – 24, 2021**

The ESMO Congress 2021 will be the global stage for the exchange and debate of translational cancer science of excellence, first announcements of practice-changing data, and multidisciplinary must-have conversations set to spur transformative therapies against cancer.

Parallel to the ESMO Virtual Congress 2021 we offer the **ESMO in the Alps** – a live meeting as well as a live broadcasted Webinar. The Scientific Committee will select the most important studies and discuss the new data in 5 main entities. We kindly invite you to meet and review practice-changing ESMO content with Swiss colleagues in a familiar and interactive atmosphere.

Next to the experts from each entity we are pleased to invite the SAKK Young Oncology Academy (YOA) as part of the this year's program.

**Registration is open on [sakk.ch](http://sakk.ch)**
